There can be little else more inviting and comforting than the warmth and glow of a real coal fire inside a traditional cast-iron fireplace. The focal point of any room, this has until recent times been mainly restricted to older properties with a chimney breast housing what is known as a class one flue.

The use of open coal fires has been severely curtailed in the last thirty years due to the implementation of smoke-less zone policies as well as the cleanliness and ease of use of gas fire alternatives.

Decorative gas coal effect fires became popular but still usually required a class one flue and were famously inefficient and expensive to run.

To reflect the change in lifestyle new houses were often built with no chimney breast but incorporating what is known as a pre-cast flue built inside the cavity of a wall and known as a class two flue. Class two flues are only suitable for gas fires and can often be seen from outside by showing a ridge vent or metal cowl on the roof instead of a traditional chimney pot.

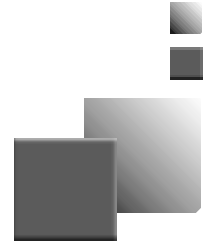

Still more houses were built without any flue at all relying totally on central heating and electricity.

Integra™ is a unique cast-iron fireplace available in three finishes with a choice of nine traditional or contemporary designs. It accommodates a realistic high output gas coal effect fire, which is not only efficient but also suitable for use with all flue types and houses with no chimney.

Welcome to the twenty-first century!

What is Integra?

Integra™ provides a simple solution to a whole range of problems that you may encounter when trying to install a cast-iron fireplace together with a gas coal effect fire into your home.

Need a high output fire? Worried about efficiency?

Most gas fires fitted into cast-iron inserts are decorative only and don't offer much heat. If you installed a cast-iron fireplace you usually had to sacrifice a decent heat output and efficiency to achieve the desired look. Now with Integra™, you can combine an efficient high output gas fire with the cast-iron insert of your choice providing a unique combination of looks, warmth and savings.

No Chimney – No Problem!

With the patented Integra™ system you can fit a cast-iron fireplace into a room with no chimney using a fan assisted gas fire called a powerflue. The only requirements are usually a suitable external wall and a standard 76mm rebated mantel. No false chimney breasts or extra deep mantels required here!

Pre-cast flue?

A class two or pre-cast flue is no obstacle for the patented Integra™ system. Integra™ inserts can be installed in conjunction with a slimline or pre-cast flue gas fire to create the fireplace you desire.

What gas fire options do I have?

The Integra Engine gas fire range is specifically manufactured to suit all Integra applications. A Radiant Engine for class one flues or traditional chimneys is available with an output of 3.75kW and an efficiency of 55%. There is a choice of manual control or hand held battery operated remote control.

For pre-cast or class two flues there is a Slimline Engine available with an output of 3.10kW and an efficiency of 50%. Again there is a choice of manual control or hand held remote control.

For rooms with no chimneys there is a Powerflue Engine available with an output of 4.15kW and an efficiency of 67% using a manual control.

Other ranges of gas fires must be suitably CE approved to fit into the Integra™ system.

Gas fires have ceramic coals as standard but a pebble option is available to suit the more contemporary designs.

See the dimensions and assembly detail on pages 14 and 15 for more information.

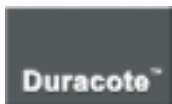

Anson Integra Full Polish

The Anson is one of the most popular designs within the Agnews range featuring the more contemporary arch design. Finished in Duracote™ for a better shine, the Anson Integra™ will suit either traditional or contemporary room settings.

- Fully polished Duracote™ insert
- Fully polished ash-pan cover
- Polished horizontal front bars
- Shaped canopy
- Can be used with either gas or electric fires

The Anson Integra™ is pictured here with the impressive Athena Victorian Corbel surround in solid black granite. Ask your Agnews retailer for details.

Anson Integra

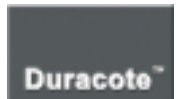

Half Polish

The Anson is one of the most popular designs within the Agnews range featuring the more contemporary arch design. Finished in Duracote™ for a better shine, the Anson Integra™ will suit either traditional or contemporary room settings.

- Half polished Duracote™ insert
- Highlighted ash-pan cover
- Polished horizontal front bars
- Shaped canopy
- Can be used with either gas or electric fires

Pictured here with the Verona surround in solid white marble. Ask your Agnews retailer for details.

Majestic Integra

The Majestic Integra™ is a new addition to the range, bringing simple elegance to the fireplace. The single highly polished Duracote™ band frames the flickering flames beautifully, providing a most sophisticated centrepiece to your room.

- Highly polished arch
- Highlighted ash-pan cover
- Polished horizontal front bars
- Can be used with either gas or electric fires

The Majestic Integra™ is featured in the Flat Victorian surround made from solid Portuguese limestone. Ask your Agnews retailer for details.

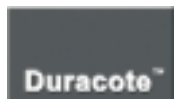

Ashbourne Integra

The Ashbourne is the archetypal cast-iron insert and the historical flagship product in our range. The Ashbourne Integra™ is no different combining style and tradition to form a beautiful insert that you'll cherish for years to come.

- Highlighted fire-front, arch and band
- Intricate floral detailing on bands and canopy
- Polished horizontal bars
- Can be used with either gas or electric fires

The Ashbourne Integra™ is pictured in the William IV Corbel surround in solid white marble. Ask your Agnews retailer for details.

Oxford Integra

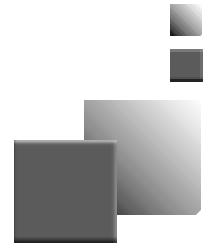

The Duracote™ finished Oxford Integra™ insert features a classic Art-Nouveau tulip design on both the outer rim and the ornate canopy. Shown here with the striking Mediterranean Poppy tiles in green and burgundy.

- Tiled insert designed to take tiles or cast-iron sleeves
- Features Art-Nouveau detailing
- Polished fire-front
- Can be used with either gas or electric fires

The Oxford Integra™ is pictured in the Solent surround in the typical Arts & Crafts style giving an Edwardian feel. The mantel is shown in solid beech. Ask your Agnews retailer for details.

Aston Integra

The Aston is a typical Victorian period tiled insert that features a highly detailed canopy. The Aston Integra™ pictured features the Oriental Iris tile set in blue and ivory and the new antique finish for that original Victorian style. Alternatively the polished Duracote™ version is available.

- Tiled insert designed to take tiles or cast-iron sleeves
- Features intricate Victorian detailing
- Range of tiles available
- Available in antique, polished or matt black finishes

The Aston Integra™ is pictured with the Balmoral surround in solid pine. Ask your Agnews retailer for details.

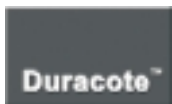

Glen Integra

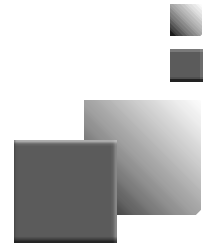

The elegant Glen Integra™ is a classic Adam-style revival cast-iron insert. The Duracote™ finish highlights the fine detailing on the outer rim and canopy. Pictured here with the optional Daisy & Urn cast-iron sleeves.

- Tiled insert designed to take tiles or cast-iron sleeves
- Features intricate Adam-style detailing
- Polished fire-front
- Can be used with either gas or electric fires

This Glen Integra™ is shown in the Ripon solid Portuguese limestone surround that features Arts & Crafts style. Ask your Agnews retailer for details.

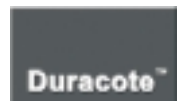

Jesmond Integra

The stunning Jesmond Integra™ is based on an award winning design that scooped a recent National Fireplace of the Year award. With its full polish Duracote™ finish and diamond design cast-iron sleeves, the Jesmond Integra™ is an attractive cast-iron insert that can grace the most contemporary room setting.

- Fully polished Duracote™ insert
- Suitable for tiles or cast-iron sleeves
- Minor detailing for a more contemporary style
- Can be used with either gas or electric fires

The Jesmond Integra™ is featured with the Lindisfarne surround shown in solid maple. Ask your Agnews retailer for details.

Roma Integra

The Roma Integra™ is another new product within the range, featuring highly polished surfaces combined with an attractive art nouveau floral motif to the canopy. The fully polished Duracote™ finish provides and helps to maintain that superb shine. It is shown here with the green and yellow Spring Tulip tile set.

- Tiled insert designed to take tiles or cast-iron sleeves
- Features art nouveau canopy design
- Polished fire-front
- Can be used with either gas or electric fires

The Roma Integra™ is shown in the Flat Victorian surround in solid black granite. Ask your Agnews retailer for details.

The range of Agnews tubeline tiles are made to the highest quality standards in five different designs and various colour options, giving 16 different alternatives to match with your tiled insert. The Luscia and Mediterranean Poppy tiles have a left and right handed design. Due to our tiles being individually handpainted colours may vary. All tiles will be subject to normal shading and crazing.

Cast Iron Sleeves

For an alternative look, this range of cast-iron sleeves feature designs in breathtaking detail. There are five traditional designs plus one contemporary design, the Milan. Again, where appropriate the designs have a left and a right handed design (Bird and Man/ Woman sleeves).

All measurements are in millimetres. Due to the nature of the manufacturing process, all dimensions are approximate to 5mm either way.

Assembly Details

Our fireplaces are either based on traditional Victorian designs, or to our designer's unique specification. Within the range you can either choose to make your fireplace traditional or equally you can use cast-iron to make a far more contemporary statement.

Agnews have been manufacturing and restoring cast-iron for over 25 years and we are very proud of the very high quality levels we insist upon for all of our products. When you look at an Agnews casting you will instantly see the greater definition in the casting, the superior shine and the attention to detail rarely seen in lesser products. The reason for this is not only in the care we take in manufacturing but in the addition of Duracote™.

This unique application which can only be found on the Agnews Premier and Integra™ Collections, seals in the shine and ensures that with a gentle cleaning, Agnews Duracote™ treated product will retain a superb finish.

As well as the products that you see in this brochure, Agnews manufacture a huge range of non-Integra™ inserts. There is a 32 page brochure called the Premier Collection which can be obtained from your retailer or by going on-line to our website at www.agnewsfireplaces.co.uk and clicking the brochure request button.

AGNEWS STOCKIST

www.agnewsfireplaces.co.uk email: info@agnewsfireplaces.co.uk

It is important to be aware that all measurements are approximate and may vary due to the tolerances involved in the casting process. Agnews fireplaces are packaged so as to minimise its exposure to adverse elements. It is important that the product remains packaged until the fireplace is ready to be installed. This will prevent it from accidental damage which will not be covered under warranty. Agnews cast-iron inserts should reach you in a perfect condition, you should however inspect all goods prior to installation. Agnews will accept no liability for product removal, reinstallation or redecoration once the product has been installed.

We recommend installation of all products by a professional fireplace installer and cannot be held responsible for damage arising from incorrect or unqualified installation. A new cast-iron fireplace which is to be used for solid fuel, must be tempered by burning 5 small fires consecutively. Each fire must consist of no more than 3kg of fuel. This procedure will ensure that heat damage through consistent use of the product will be minimised. Agnews will accept no responsibility for such damage if this procedure is not followed. The use of petroleum based fuels is not recommended and will invalidate your guarantee.

All fireplace tiles will experience signs of shading and crazing. This condition is considered normal and disputes of such nature regarding the finish will not be entered into. All Agnews Fireplace products are produced to our own designs or are manufactured under license. Designs and photographs shown are the subject of registered design application patent pending, copyright and/or unregistered design right of Agnews Fireplaces. Legal action will be taken against any infringement of these rights.

Due to our policy of continual product development, Agnews reserve the right to modify, withdraw or change materials, designs and specifications of any of the products shown in this brochure without any prior notice. It is recommended that you check with your Agnews Fireplace Stockist to ensure your product is to the specification you require prior to purchase.

Colour and shade reproduction in this brochure are as accurate as the printing process will allow.
